Christ Within — was the topic of Pastor William E. Carpenters sermon last Sabbath, September 22, based upon Ezekiel 1:15, 16, "Now as I beheld—the living creatures, behold one wheel upon the earth, by the living creatures with their four faces." "The appearance of the wheels and their work was like unto beryl, and they four had one likness, and their appearance and their work was as it were a wheel in the middle of a wheel." Pastor Carpenter explained— "The wheels represent the workings of the Holy Spirit and heavenly angels the one wheel represents Christ within you the face of glory. Even the mystery which hath been hid from ages, and from generations but now is made manifest to his saints," Col. 1: 26.

Pastor Carpenter said — "In this space age, man is looking in the wrong place, we should look the way God looks; the focus should be upon the inner man, rather than upon outer space, 1 John — 2: 3, 7, 8, It is spiritual things we are to become concerned about. 2 Cor. 4:18, We should never forget— the cast of this infinite project of Christ within me. Only through dying, could Christ impart life to us."

RURAL AREA DEVELOPMENT

NOTE: IF YOU ARE NOT CIVIC MINDED DO NOT READ THIS!

This Is The Fifth In A Series Of Articles Concerning Appomatttox County And Its Rural Area Development Program

FORESTRY

The Appomattox Area Development Committee would like to present the part that forestry contributes to the economical growth of Appomattox County.

In 1950 about half the people (1000) in Labor forces were employed in forestry or relative fields. In 1959 forest products supplied 4% of the value of all farm products in our country.

Appomattox County has 155,335 acres of commercial forests which amounts to about 71% of its total area. Of this there is approximately 15,000 acres of state forest which leaves the balance privately owned.

The net sawmill volume is estimated at 264.3 MBF (million board feet). The estimated total cut is 15.6 MBF of saw timber and 53,000 cords of pulp wood.

At the same time the estimated annual growth is 12.8 MBF of saw timber and 70,000 cords of pulp wood.

In 1960 there were $2,592.00 paid in taxes for harvested timber which gives you an idea of money involved in the forest industry of Appomattox County. The rates for example: pine lumber, 15c per thousand board feet; pine pulp 7.5 cents per cord; hardwood lumber 7.5 cents per thousand board feet, etc.

We are cutting more timber than is growing back yearly, which means that our forest resources are becoming depleted and eventually endangering the jobs of our labor forces, besides decreasing the flow of money in the county. This will affect the economy of many people. A solution can and should be worked out.

When a boundary of timber is sold, if the owner would consult a state forester he would have a better idea of the amount and value of the timber in the boundary. The forester will mark trees to be cut or mark the trees to be left for seed trees, as the law requires, at a very reasonable fee. If the forester's advice is taken there would be enough smaller trees and seed trees left to soon replace the timber which was cut.

Non productive land should be seeded or replanted with seedling. The cost of this is shared by the government. We think if the above practices are followed it would help solve the timber problems.
